

Express

Transcription & Dictation Software

Record

Express Dictate lets you dictate using a computer or 'dock' recordings from a portable recorder. *DialDictate* lets you dial into a computer to record dictation and control recording, replay and editing pressing numbers on your telephone keypad. *MSRS* is multiple channel recording software ideal for court and conference recording.

Transmit

Transmit recordings directly to typists using the internet or a local area network. As long as you have access to a computer or telephone, you can dictate from where you are - even overseas. Recordings can also be encrypted for privacy and security.

Transcribe

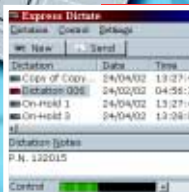

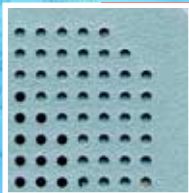

Express Scribe is professional audio playback software designed to assist transcription of recordings. *Express Scribe* can be controlled with foot pedals or 'hot' keys and can be integrated with speech-to-text voice recognition software.
